

Measuring to order a patch set for the Advanced Beginner Dress

Headband: Measure the head circumference in the place the dancer would normally wear a full headband, going behind the ears.

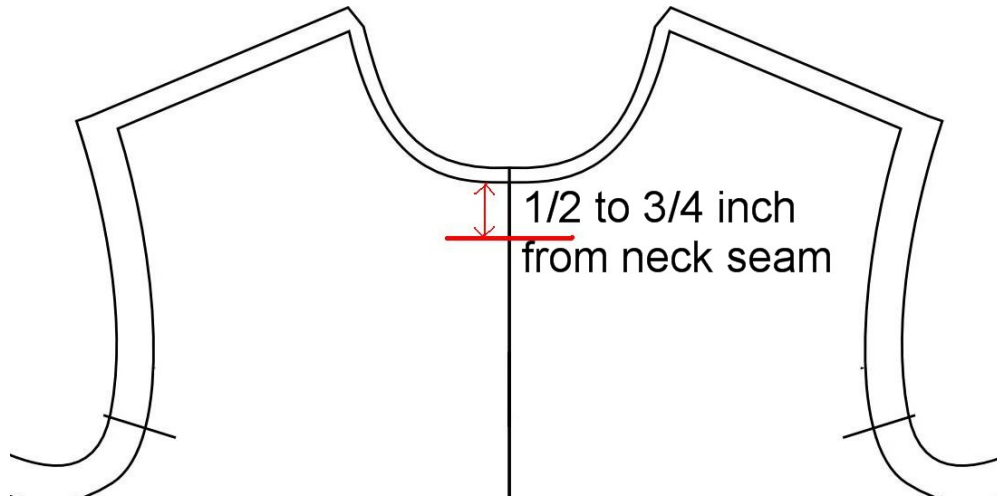

Chest patch: Measure the width between the front armscye seams as shown below.

Cape: Measure the length of the back of the dress from the top of the zipper to the hem. Measure the width between the back armscye seams.

Placement of front patch: The center point of the patch should be $\frac{1}{2}$ to $\frac{3}{4}$ " from the finished neckline, ideally. If the outside/top edges of the patch cover the shoulder seams, drop it lower.

Placement of cape attachments: See below.
